

include/link.h

```
graph TD; A[include/link.h] --> B[string.h]; A --> C[types.h];
```

The diagram illustrates a header file dependency. At the top, a dark gray box labeled 'include/link.h' has two blue arrows pointing downwards to two separate boxes. The left box is light gray and labeled 'string.h', while the right box is white and labeled 'types.h'. This indicates that 'include/link.h' includes both 'string.h' and 'types.h'.
